

## Study Island

The lazy days of summer may be fun for kids, but studies show it comes with a price. Kids lose much of what they learned in school during this extended break. Fix the summer brain drain problem in an entertaining way with [studyisland.com](http://studyisland.com), a computer website that helps tutor or accelerate your child in math and language arts.

Study Island is also a great tool to help your child throughout the school year prepare for the ISTEP + standardized test that they will take each spring in grades 3-6.

The Study Island program is built specifically from state standards and is designed to create a very user-friendly experience for students. The user-friendly interface allows students to move through the program step-by-step. Each section has a pre-test and a post-test, as well as topics that cover each of the Academic Standards. Topics consist of questions, answers, explanations, and lessons that address the specific skills required in order to master the Academic Standards.

Your child will learn their computer password and number at the beginning of the school year that they will need to log onto Study Island.

If you need further information, please call Centerville-Abington Elementary at 855-5132.
